	field. There was no flying between 10 a.m. and 4:30 p.m. About 40 railroad cars including 12 tank cars were observed on the spur track	25X1
	of the field. A train of 52 cars was proceeding to the airfield. Six	
	of the cars were loaded with field kitchens. On a siding of the Neureters-	
	hain railroad station, 30 railroad cars	25X1
	while 24 railroad cars were loaded with equipment	•
	while the other cars were loaded with	051/4
	boxes . At 4:10 p.m.,	25 <b>X</b> 1
	four railroad cars loaded with concrete pillars at the Welzow railroad	
	station. Thirty-two railroad cars loaded with boxes were seen at Drebkau.	
	Six of the cars were flatcars which were loaded with one crate each which took up the entire loading surface of the car. 3	
	over whom of promise hearthoo of one off.	
9.	About 300 meters south of the railroad junction, south of Neupstershain,	
	observed a fence. About 100 meters southwest of the Hoyers-	25X1
	werda-Neupetershain railroad line, a radio station and truck A power unit near the radio station was guarded by a	25 <b>X</b> 1 25 <b>X</b> 1
	Soviet sentry,	20/(

	by the bomber regiment from Jueterbog, which is believed to be equipped with eight IL-28s. However, only four IL-28s have been observed in Welzow.	
	Construction work at the field has been completed. A rear detail is	
	apparently employed on the manufacture of structural parts to be used	
٠.	for aircraft revetments at other installations.	
2.	Comment. Information on the location of the radio installation	25X1
- 4	was received previously. Efforts have been initiated to obtain	
	photographs of the radio installation, the type of which has not	
	yet been determined.	
3.	Comment. It appears that equipment including jet engines is being	25 <b>X</b> 1
	sent from the U.S.S.R. to Welzow airfield. The shipments observed may	
	have been connected with a replacement of the aircraft equipment for	

SECRET,

the units stationed at the field.
